

Hacene

Electrical Engineering Student | Aspiring Systems Builder | Football Athlete

Email: mouhoubhasen@gmail.com

Portfolio: <https://hacene-ee.github.io>

Professional Profile

Electrical engineering student with a strong interest in real-world systems, embedded systems, backend infrastructure, networking, and control systems. Focused on understanding systems deeply from both physical and digital perspectives. Developing a systems-oriented mindset through technical exploration and structured project planning.

Planned Technical Projects

Smart Water Pump Control System

Designing a remote monitoring and control system for water pump infrastructure using embedded systems and network interfaces.

Linux Server & Backend Environment

Building and managing a local backend environment using Linux, Nginx, Gunicorn, and backend services.

Athletic Profile

Practicing football consistently since the age of 9, developing discipline, team coordination, tactical awareness, and performance under pressure. Experience in structured team environments contributing to communication and strategic execution.

Technical Direction

Area	Focus
Backend	Flask, Nginx, Gunicorn
Systems	Linux, Networking, Infrastructure
Engineering	Control Systems, Embedded Systems
Version Control	Git & GitHub
